I. Vector Arithmetic(CBSE)

Question: AOBC is a rectangle whose three vertices are vertices $\mathbf{A}\,(0,3)$, $\mathbf{O}\,(0,0)$ and $\mathbf{B}\,(5,0)$. The length of its diagonal is

Solution: Direction vector of **AB** : $m = \mathbf{B} - \mathbf{A}$

$$\mathbf{AB} = \begin{pmatrix}5\\0\end{pmatrix} - \begin{pmatrix}0\\3\end{pmatrix} = \begin{pmatrix}5\\-3\end{pmatrix} \tag{1}$$

length of **AB**(Diagonal):$\|\mathbf{m}\|^2 = mm^t$

$$\|\mathbf{AB}\|^2 = \begin{pmatrix}5-3\end{pmatrix}\begin{pmatrix}5\\-3\end{pmatrix} \tag{2}$$

$$\|\mathbf{AB}\|^2 = 5^2 + (-3)^2 \tag{3}$$

$$\|\mathbf{AB}\|^2 = 25 + 9 \tag{4}$$

$$\|\mathbf{AB}\|^2 = 34 \tag{5}$$

$$\|\mathbf{AB}\| = \sqrt{34} \tag{6}$$

so, length of diagonal= $\sqrt{34}$.
